

Year 4 Top 10 Home Learning Ideas

Hello Year 4. We hope that you are all well and taking lots of care! We have got some exciting learning opportunities for you to get involved with at home. We hope that you are up for the challenge!!!!

Idea 1 - Star Gazer

If your grown up will let you, stay up one night until it gets dark and watch the stars - what do they look like? Can you see any patterns? See if you can draw the patterns you always appear. Why might this be?

Idea 2 - Moon Diary

When you about to go to sleep at night, take a quick look at the moon. What does it look like? Draw a picture of it and add it to a Moon Diary. Each night do the same so you can see how it changes over the next couple of weeks. You need to look carefully as the changes might be very small each day.

Idea 3 - Make a Den

Find as many big sheets as you can (they could be bed sheets, towels, jackets - make sure you ask a grown up first). Using what you have found, can you make a den to fit your whole family inside? How many sheets have you used? Halve this number. Can you still make a den that works?

Idea 5 - Random Acts of Kindness

There are 52 weeks in the year - this is week 3. How many weeks does this mean are left? You need to create and plan a small act of kindness that you could do each week for the rest of the year. What will you do for the weeks left this year? Can you make sure that each one is different and you don't repeat yourself? A few examples could be; picking a flower for someone special in your house, making someone special a drink or a snack or giving someone special a hug. The choice is

yours. On a calendar make a note of your acts of kindness.

Idea 6 - Creaky Floorboards

You keep stepping on a creaky floor board in your room. One night you decide to take a look and what you find underneath shocks and amazes you! Why not draw, paint or sketch what you saw.

Maybe it was a long lost photograph, a million pounds or maybe even a whole civilisation of tiny people living there. The choice is yours but be as creative as possible.

Idea 7 - Have a

Idea 8—Imagine winning £5000. What would you spend it on? Would it be one big item, lots of little items, things for yourself or for others? Calculate the cost of your items and how much money you have left over.

Idea 9—Still Life Art—Gather a range of items from around your home and make an arrangement. The items could be anything from fruit and

Idea 10—Play Countdown. Make 20 number cards, 1—20 and four number cards from 20 to 100. Turn them over and mix them up. Choose six cards. Ask someone to generate a three digit target number. Use addition, subtraction, multiplication and division to try to get as close as possible to the target number. Make it easier by not including the numbers to 100 and having a two digit target number.
